

Ground-Up Money Foundation — Intake Checklist

Prepared: September 07, 2025

Roles & Rules — Judge: decisions only. Audrey: collection & copy/paste. — Keep private: Work locally; do not upload to cloud drives. Step 1 — Create a 'Finance Vault' folder on your PC • Subfolders: /Statements/Bank, /Statements/Cards, /Statements/Loans, /Taxes/ByYear, /Plans/ • Save all files as PDFs or CSV (Comma-Separated Values). Step 2 — Collect 6 months of data (Audrey) • Bank: monthly statements OR export CSV for all transactions. • Credit cards: monthly statements OR CSV exports. • Loans/Mortgage: latest statement (APR, payment, balance). • Pay stubs or deposits list (income). • Insurance & utilities: latest bill that shows due date & amount. Step 3 — Populate the workbook • Open Cashflow_Foundation_Workbook.xlsx → 'Transactions' tab. • Paste Date, Account, Description, Amount (positive income, negative spending). • Categories optional; you can add later. • 'Summary' tab shows average monthly surplus and a proposed EXTRA. Step 4 — Turn on automations at the sources • Autopay Minimum ON for every debt (cards/loans). • Schedule a recurring EXTRA = the workbook's proposed amount → apply to the highest APR debt. • When that debt hits \$0, move the SAME EXTRA to the next-highest APR. Step 5 — Emergency Fund • High-yield savings as parking. Target 3-6 months of expenses (or 12 months for max safety). • Set a recurring monthly transfer until you reach target. Step 6 — Monitoring (low-noise) • Bank/card alerts: large transaction, failed autopay, low balance, card-not-present, international. • Monthly 10-minute review: glance at the Summary and confirm automations ran. Optional — LM Studio (offline AI) • Use it to parse PDFs/CSVs in your Vault, generate a one-page 'Judge's Financial Brief,' and flag anomalies. Not required to launch the system.
